Rotary rinsers or air blowers
For new bottles

CAPACITIES: 40 TO 400 BOTTLES PER MINUTE
Rotary rinsers or air blowers for new bottles

Because equipment is constantly improved, above specifications can change without notice.

**Principle**
- Rinsing or air blowing of the interior of the bottle.
- Infeed by endless worm and starwheel.
- Bottle gripping ability by the neck.
- Turning over above an internal spray nozzle:
  - of water: rinser version.
  - of air: air blower version.
  - of recycled solution: product rinser version.
- Draining off with drop-break.
- Turning down and exit.

**Features**
- Electrical height control.
- Safety devices on infeed worm, infeed and outfeed starwheels.
- Gripping fingers removable without tools.
- Machine-cover and electrical box stainless steel made.

**Options**
- Laminar flow of sterile air.
- Universal starwheels and gripping fingers (according to sample).
- Water recycling system.
- On-board bottleneck drop suction device.

- Gripping system without lubrication.
- Valve without joint and removable drip tray without tool for a better sanitation.
- On-board drop suction device (option).

- The dummy bottle device closes the spray nozzle for an optimized chemical or thermal sterilization.

---

### Fluid inlet

- Dummy Bottle device
- Spray nozzle
- Drip tray
- Bottleneck drop suction
- Gripping actuator
- Cam fork
- Gripping finger

### Capacity and Consumption Table

| Number of heads | Capacities (75 cl BpM) | Installed power kW | Consumption
